

What is Roxus?

Roxus contains vardenafil, an ingredient that's been used to treat ED for years. What's different is how it's delivered.

A modern way to treat ed

Instead of a pill you swallow, Roxus is a spray you use in your nose. Because it's absorbed through the nasal lining, it skips the digestive process a pill has to go through, so it can start working faster.

Roxus builds on established PDE5 science. It contains a clinically proven PDE5 inhibitor, delivered in a new way.

SPRAY

WORKS IN
MINUTES

PHYSICIAN
PRESCRIBED

You're not alone

Erectile dysfunction is common. More than half of men between 40 and 70 experience some degree of it.¹

It's not just a physical issue. In some relationships, ED has been identified as a major factor in the relationship ending.²

ED is treatable. Roxus is one option your provider may discuss with you.

52%

of men 40—70 experience some degree of ED¹

15%

of relationship breakdowns cite ED as a major factor²
